## 2. FEATURES & TECHNICAL EXPLANATION

---

### 2-1.FEATURES

#### ■ Automatic process from washing to drying.

Automatic process from washing to drying can be selected easily.

Washing capacity : 15  $\frac{5}{2}$  lbs. i 7.0 kg i d

Drying capacity : 8  $\frac{4}{5}$  lbs. i 4.0 kg i d

#### ■ More economical by Intelligent Wash System

Intelligent Wash System detects the amount of load and water temperature, and then determines the optimum water level and washing time to minimize energy and water consumption.

#### ■ Direct Drive system

The advanced Brushless DC motor rotates the Drum directly without belt and pulley.

#### ■ Child-Lock

The Child-Lock system has been developed to prevent children from pressing any button to change the program during operation.

#### ■ Low noise speed control system

By sensing the amount of load and balance, automatically distributes load evenly to minimize the spinning noise level.

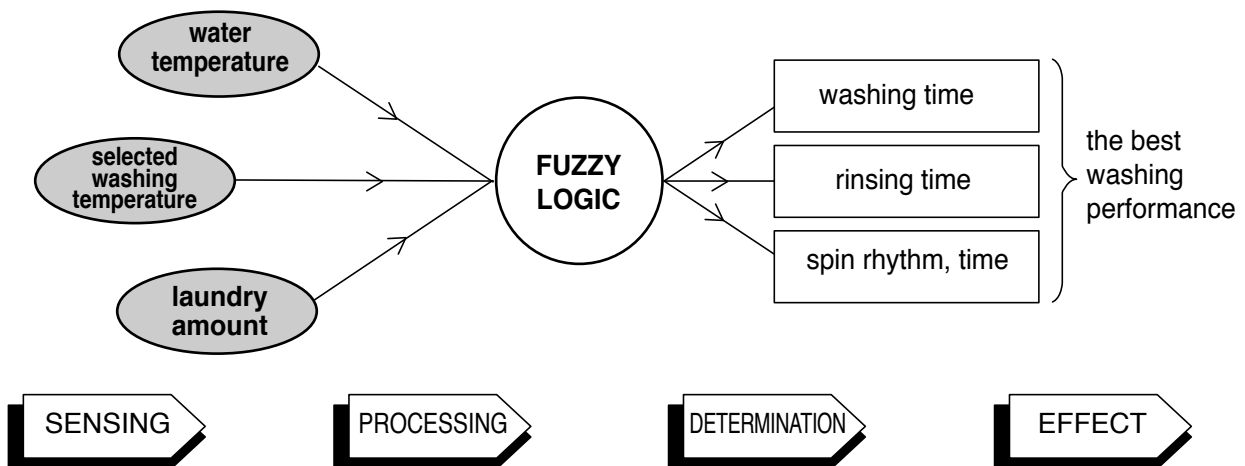

#### ■ Auto Restart

Although the washing machine is turned off by a power failure, it restarts automatically where it stopped when power is supplied again. And it will be the same if the machine unplugged and is plugged in again.

---

## 2-2.DETERMINE WASHING TIME BY FUZZY LOGIC

To get the best washing performance optimal time is determined by sensing of water temperature, selected washing temperature and laundry amount.

## 2-3.WATER LEVEL CONTROL

- This model adopts a pressure sensor which can sense the water level in the tub.
- Water supply is stopped when the water level to the preset level, then the washing program proceeds.
- Spinning does not proceed until the water in the tub reduces a certain level.
